-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Applicant's election of claims 1-6 in the reply filed on 4/15/08 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01. The omitted structural cooperative relationships are: there is no claimed relationship between the noble metal and the oriented layer. For purposes of examination, the examiner has considered the claim to include any oriented layer as claimed which includes a noble metal or is adjacent to or near a noble metal.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 1794

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1-5 are rejected under 35 U.S.C. 102(e) as being anticipated by Futamoto et al. (US 6562453).

Futamoto et al. disclose a magnetic recording medium having a substrate, (100) MgO layer (examiner notes that (100) is the equivalent of (001)), a non-magnetic layer formed from a material selected from a group including Ti, Zr and Hf and a magnetic layer formed from CoCrPtNb wherein the Pt in this layer meets the claim limitation directed to a noble metal. The thickness of the Hf film given in example 2 is 3 nm. See col. 2, lines 50-57; col. 3, lines 27-42; col. 4, lines 34-47; col. 5, line 51 to col. 6, line 4.

6. Claims 1 and 4-5 are rejected under 35 U.S.C. 102(e) as being anticipated by Lee (US 7108926).

Lee discloses a magnetic recording medium having a substrate, a perpendicular magnetic enhancement layer formed from Pt, Au, or Pd (ie noble metals) and a Ti layer thereon (col. 2, lines 31-45).

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hirayama et al. (US 6916557) is cited as art of interest.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to /Holly Rickman/ whose telephone number is (571) 272-1514. The examiner can normally be reached on Monday-Friday 9:30-6:00.
